

ADVANCED TECHNOLOGY,  
SUPERIOR PERFORMANCE  
AND EXCEPTIONAL SERVICE

*It all starts with*  **VARTA**<sup>®</sup>

## NOW IT'S EVEN EASIER TO FIND EXACTLY WHAT YOU NEED

This catalogue is an essential guide to the facts you need about the extensive range of VARTA® products, technology and services, including the revolutionary VARTA Start-Stop Service Program (VSSP).

### *How and where to find the right VARTA battery*

On our homepage, at [www.varta-automotive.com](http://www.varta-automotive.com), key in the vehicle manufacturer and model, or selected performance features, and the online Product Finder quickly finds what you need.

Then, when you're armed with the name of the product, simply enter your country and postcode, and our Retailer Search gives you a list of local dealers.

You can also use the application list on page 31 of this catalogue.

[www.varta-automotive.com](http://www.varta-automotive.com)

## WHY YOU CAN TRUST VARTA® BATTERIES – AND CONFIDENTLY RECOMMEND US TO YOUR CUSTOMERS

Over the last century, vehicle technology has evolved enormously and VARTA has been at the forefront of developing both world-class battery technology and innovative services. As a result, we have built an unparalleled reputation and earned the trust of Original Equipment (OEM) and Aftermarket customers around the world.

***Today, you'll find our products in millions of cars, heavy commercial vehicles, motorcycles, powerboats, motorhomes...***

So every day, millions of people and businesses around the world rely on VARTA. And when you choose any one of our products, you can too.

VARTA products are designed to deliver superior power and reliability, less corrosion and greater efficiency for a longer battery life, all resulting in lower cost of ownership.

***Our comprehensive range includes:***

- For standard automotive use, the **Dynamic Trio** has our patented **PowerFrame®** stamped grid technology
- For vehicles with Start-Stop features, our **Start-Stop range** with advanced AGM technology ensures greater fuel efficiency and extremely reliable cycling performance
- For commercial vehicles and heavy commercial vehicles, our **Promotive Trio** combines high durability and exceptionally reliable performance with low Total Cost of Ownership
- For motorbikes, jetski, quads and snowmobiles, the **Powersports range** supports many applications
- For boats and caravans, the **Professional range** offers excellent reliability and best value for money and discharge cycles

Many leading car manufacturers trust VARTA®. And with unrivalled experience, innovation, performance, service and support to count on, so can you and your customers.

*It all starts with VARTA®*

# THE INDUSTRY-LEADING START-STOP RANGE, MADE TO DRIVE YOUR BUSINESS FORWARD

By 2015, the majority of new vehicles manufactured and sold in Europe will contain Start-Stop technology. VARTA® is the world's leading supplier not only of Start-Stop batteries, but also a ground-breaking Start-Stop Service Program. Let us help you grow your business and increase your profits.

## ***Powerful Start-Stop Plus for high performance cars***

Our VARTA Start-Stop Plus, powered by AGM technology, is specifically designed to meet the huge energy demands of vehicles equipped with advanced Start-Stop systems, such as regenerative braking. This is a battery that delivers optimal performance, faster conductivity and reliable starting power, even when the charge is low.

- Designed for advanced Start-Stop functionality
- State-of-the-art AGM technology to meet OE manufacturer requirements
- 3x higher cycling endurance
- High deep discharge

## ***The latest technology for entry level Start-Stop vehicles***

When it comes to Start-Stop vehicles, entry-level doesn't mean basic. Which is why our VARTA Start-Stop battery provides extraordinary levels of reliability, battery life and consistency in performance. With this battery's optimised EFB technology you get dependable energy, every single day.

- Designed for entry-level Start-Stop functionality
- Latest EFB technology to meet OE manufacturer requirements
- 2x higher cycling endurance

## ***Why vehicles with Start-Stop systems need specific Start-Stop batteries***

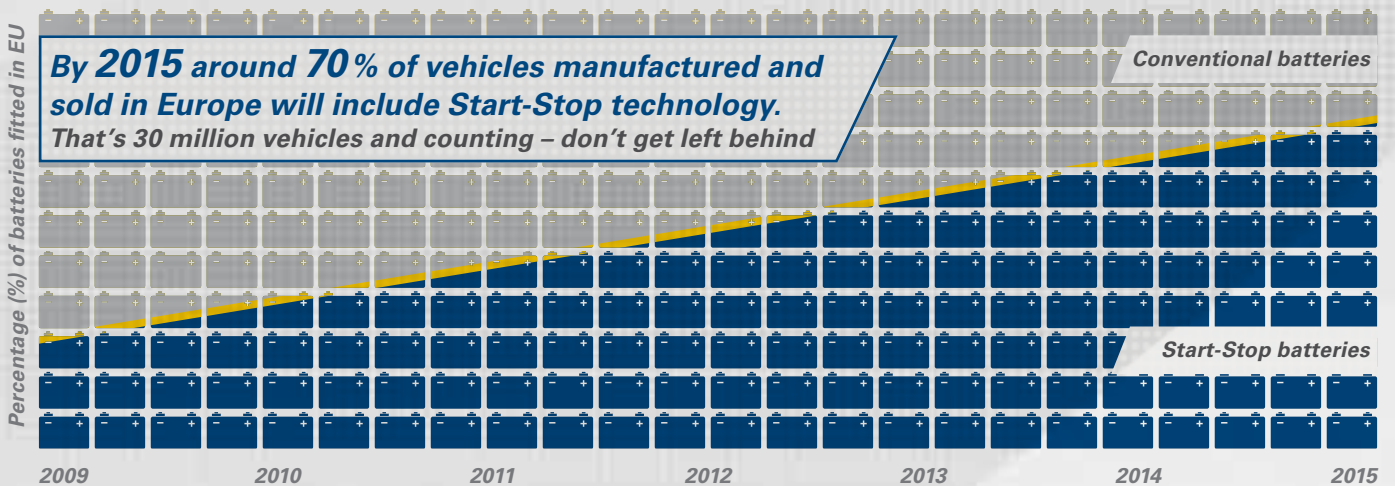

With Start-Stop vehicles, it's vital to fit the right battery. That's because the wrong battery impairs the Start-Stop function and noticeably reduces battery life. In fact, tests show that conventional batteries lose between 7% and 16% of available capacity after just one week's use in a Start-Stop equipped vehicle.

Features	Start-Stop Plus	Start-Stop
Number of battery types	5 Types	5 Types
Primary function	Advanced Start-Stop functionality	Entry Start-Stop functionality
Cold cranking power	CCA 135%*	CCA 115%*
Battery technology	AGM – Absorbent Glass Mat	EFB – Enhanced Flooded battery
Positive grid/Negative grid	PowerFrame®/Casted grid	PowerFrame®/Expanded grid
OE quality	Meets OE requirements	Meets OE requirements
Cycling endurance	3x higher*	2x higher*
Capability of deep discharge	High*	Middle*

\*Compared to conventional batteries

**There's an increasing growth in demand for Start-Stop batteries**

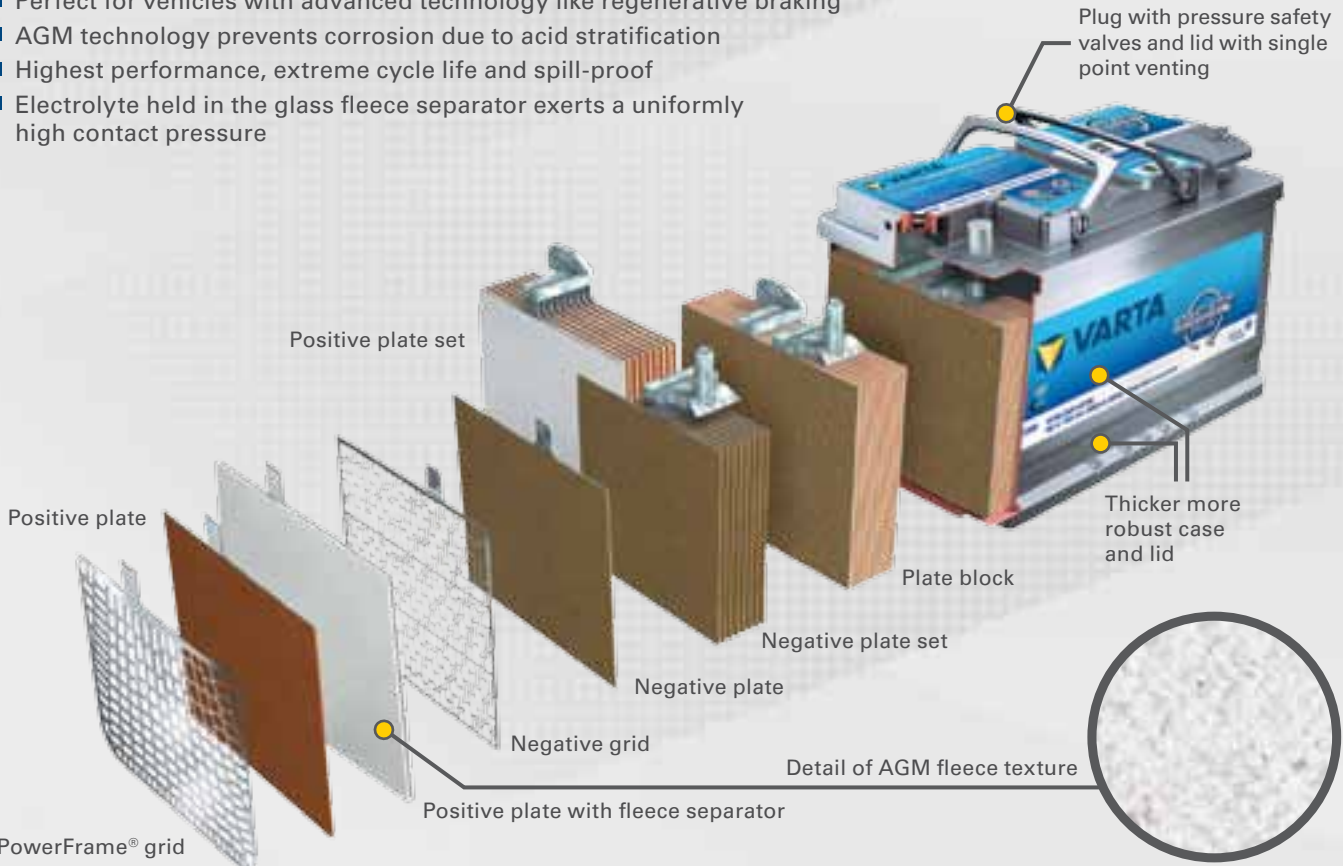

# OUTSTANDING PERFORMANCE FOR ADVANCED START-STOP VEHICLES WITH AGM TECHNOLOGY

This market-leading product is designed especially for high-performance, premium Start-Stop vehicles with regenerative braking and other fuel-saving technologies. With this battery fitted, they'll perform at their peak, time and time again.

That's because for optimal performance of these advanced vehicle systems, it's essential to have the right battery technology. Which is why VARTA® partners with leading manufacturers to develop innovative solutions for Start-Stop vehicles. Today, VARTA is the market leader supplying virtually all leading manufacturers with AGM Technology batteries for their original equipment.

- Constructed with advanced Absorbent Glass Mat (AGM) technology
- Perfect for vehicles with advanced technology like regenerative braking
- AGM technology prevents corrosion due to acid stratification
- Highest performance, extreme cycle life and spill-proof
- Electrolyte held in the glass fleece separator exerts a uniformly high contact pressure

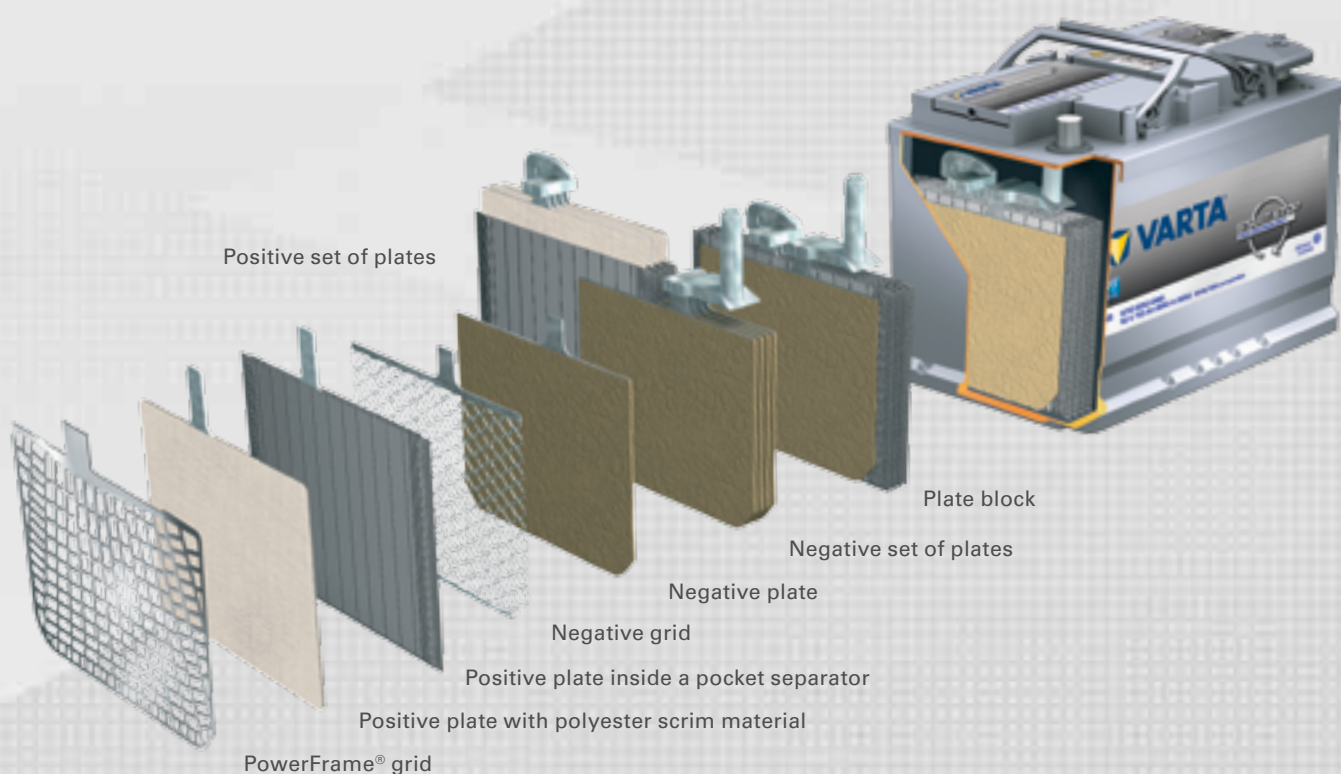

## ADVANCED PERFORMANCE FOR ENTRY LEVEL START-STOP VEHICLES WITH EFB TECHNOLOGY

Vehicles with a standard, entry-level Start-Stop function still place big energy demands on a battery. And this sophisticated product featuring EFB technology is specifically designed to meet them with ease, providing twice the cycle life of standard lead-acid batteries.

- Constructed with Enhanced Flooded Battery (EFB) technology
- Specifically developed for standard entry-level Start-Stop vehicles
- EFB uses special polyfleece 'scrim' to hold additional active material
- Enhanced cycle performance versus conventional flooded batteries

## TOP PERFORMANCE – WHATEVER THE VEHICLE

VARTA® Start-Stop Plus batteries are designed to meet the highest energy requirements. Which makes them as effective for Start-Stop vehicles as they are for other special vehicles with high demands.

Whether the journey is short, has frequent stops or requires electronic equipment, like satellite navigation to be powered while stationary, VARTA Start-Stop Plus batteries deliver optimum power, energy efficiency and starting performance.

### *The advantages at a glance*

- OE specifications for high performance and luxury vehicles
- Specifically designed for extreme power demands
- Extra-long service life
- Totally maintenance free

#### *Perfect for:*

- Police/emergency vehicles
- High-end luxury cars
- High-performance cars
- Executive class vehicles with high equipment levels
- Hybrid vehicles (12 V)

## VARTA®. THE DRIVING FORCE BEHIND START-STOP

It's a fact that the majority of top car manufacturers trust VARTA products to always deliver. Our strength lies in developing strong working relationships with car makers to develop the best batteries for the best new vehicles. Recently, close collaboration with top names such as Audi, BMW, Ford and Mercedes-Benz, has led VARTA to develop advanced Start-Stop batteries.

# THE ADVANCED BATTERY AT THE HEART OF THE START-STOP SYSTEM

Everyday driving, especially in the city with frequent stops, puts a considerable strain on a Start-Stop battery. In fact, it's not uncommon to start and stop four times every kilometre. This means that the battery must cycle on and off constantly, and often needs to start the vehicle with only a partial charge. A Start-Stop battery will often use energy from the alternator or regenerative braking to quickly restore energy.

As a result, the Start-Stop battery is specifically designed to power these countless starts without any significant loss in capacity. Because we've worked with original equipment manufacturers for decades, you can be sure a VARTA® Start-Stop battery will always perform at its best.

ENERGY FLOW OF THE START-STOP PLUS BATTERY

*Start-Stop batteries are designed to meet intense cycle requirements caused by a high number of starts.*

ENERGY FLOW OF THE START-STOP BATTERY

ENERGY FLOW OF THE CONVENTIONAL BATTERY

*Conventional batteries are not a solution and their installation may lead to premature failure.*

## TECHNICAL CHALLENGES FOR THE WORKSHOP

There's a lot more to replacing a Start-Stop battery than simply removing the old one and installing a new one. Connected to the on-board electronics by a battery management system (BMS) or intelligent battery sensor (IBS), the battery is the heart of the Start-Stop system and key to maximising the environmental benefits.

In order to maintain comfort and keep consumption down, many vehicle manufacturers link the installation of a new battery in a Start-Stop vehicle to a memory reset. To do so, it's vital to have the right diagnostic tool.

But that's not all. Selecting the right battery and the various installation processes (see photo) present further challenges. So it's essential to have up-to-the-minute installation instructions to prevent damage to the vehicle's electronics or mechanical components and to ensure quick, reliable starts.

So how many independent workshops are properly equipped to replace Start-Stop batteries? We asked 1,200 top European workshops if they felt ready. And because almost 60% said 'no', we developed a unique service program to support both workshops and wholesalers.

Read on for details of how VARTA® gives you reliable answers to every Start-Stop question to help you profit from this fast-growing sector.

# SMART TECHNOLOGY, SERVICES AND SUPPORT FOR YOUR BUSINESS

The VARTA® Start-Stop Service Program (VSSP) is designed specifically for independent workshops. This comprehensive program provides everything your business needs to replace Start-Stop batteries professionally and profitably.

## ***The VARTA Start-Stop Service Program (VSSP)***

As the number of vehicles with Start-Stop systems and batteries rapidly increases, so does the demand to replace them. The VARTA Start-Stop Service Program (VSSP) makes changing these batteries far easier and safer. The program gives technicians the technical training and tools to choose and install the right products. And they can test the batteries and run diagnostics on the relevant control devices, delete fault codes and reset the memory. They'll also see step-by-step instructions on how to remove and install the right battery in every Start-Stop vehicle currently available.

### ***Unrivalled VARTA Start-Stop and Start-Stop Plus batteries***

These innovative products have been developed in close collaboration with the world's leading vehicle manufacturers. So no wonder the majority of Start-Stop vehicles are factory-fitted with VARTA.

### ***A state-of-the-art replacement tool: VSSP 2.0***

This sophisticated tool tests the technical function of the battery, provides a Start-Stop system diagnosis, and makes deleting fault codes and memory resets simple. The program also displays clear, vehicle specific installation and removal instructions. And the tool even provides an assessment of the replacement battery and confirms installation is 100% complete. As VSSP 2.0 receives information from a secure online VARTA partner area, you can be sure this invaluable resource is always up to date.

### ***Full training by automotive training experts eXponentia***

You'll get both practical courses and online training, covering everything from avoiding common installation errors to explaining the results of diagnostic testing to your customers. With such comprehensive training, you and your colleagues will quickly be able to benefit from the growing Start-Stop market.

### ***The most precise information, always available***

With VARTA, you can rely on a continually updated Start-Stop service program database. This provides accurate information about specific vehicles, and battery fitting, plus correct removal and replacement procedures.

#### ***Continuous marketing support***

To support the independent workshop, a range of marketing resources are designed to be used at all retail levels, helping to establish a successful business model and build loyalty among customers.

#### ***The full backing of the award winning VARTA® brand***

As vehicle systems become more advanced, trust in unbranded workshops is reducing. But with the VARTA name to count on, it's easier to boost customer confidence. And because VARTA is an experienced OE manufacturer, able to provide the most up-to-date knowledge, any garage business can feel reassured too.

***For more information, visit [www.varta-automotive.com](http://www.varta-automotive.com)***

### ***A unique roadside assistance program***

VARTA Start-Stop batteries embody outstanding quality. That's why we provide a VARTA mobility guarantee for anyone who buys a VARTA Start-Stop battery. The exclusive guarantee gives your customers the reassurance of:

- Two years complete protection in the event of a battery fault
- 24-hour hotline to ARC customer service team
- Europe-wide, on-the-spot breakdown assistance: jump-starting, towing service to the nearest qualified workshop

To register, all a customer has to do is visit [www.varta-automotive.com](http://www.varta-automotive.com) and input their VARTA guarantee number, which comes with the leaflet from the workshop where their VARTA Start-Stop battery was installed. And to make it easy for workshops, this is the same number on the final report in the VSSP 2.0.

# FOR EXCEPTIONAL POWER ACROSS EVERY APPLICATION, THERE'S ONLY ONE DYNAMIC TRIO

Each battery in our popular VARTA® Dynamic Trio range is designed for specific uses and between them they cover a huge number of applications. But there's one thing they all have in common: state-of-the-art PowerFrame® stamped grid technology.

The product of low-emission manufacturing, this patented, next generation grid technology delivers optimum energy flow, unparalleled performance and uncompromising reliability. As a result, whatever the demands you place on a battery, and no matter what the application, you can be sure there's a VARTA battery for the job.

## **SILVER Dynamic**

High-performance, highly equipped vehicles require the greatest demands from their battery. That's where our SILVER Dynamic battery excels. Ultra reliable, it meets or exceeds all OE requirements, has extremely high reserve capacity and superb cold start performance. In short, this is a premium SLI battery that always delivers.

### **Key benefits**

- Designed for high-performance vehicles with extremely high power demands
- Exceptional cold cranking power up to 122 %
- PowerFrame grid technology for longer life
- Exceeds OE requirements

## **BLUE Dynamic**

Looking for a solid all-rounder? Look to BLUE Dynamic. Our best-selling replacement parts battery meets OE specifications, delivers best in class starting power and cold start performance, and has a large load capacity. This high quality product is ideal for vehicles of every class.

### **Key benefits**

- Designed for vehicles of all classes
- Optimal cold cranking power up to 110 %
- PowerFrame grid technology for longer life
- Meets OE requirements

## **BLACK Dynamic**

Cars with standard levels of electrical equipment may need less battery power, but they still demand superior starting, consistent performance and absolute reliability. And that's exactly what you get with BLACK Dynamic, a tried and trusted choice in the aftermarket.

### **Key benefits**

- Designed for vehicles with less complex power demands
- 100 % cold cranking power
- PowerFrame grid technology for longer life
- Meets OE requirements

Features	<i>SILVER Dynamic</i>	<i>BLUE Dynamic</i>	<i>BLACK Dynamic</i>

OE quality	Exceeds OE requirements	Meets original equipment	Meets original equipment

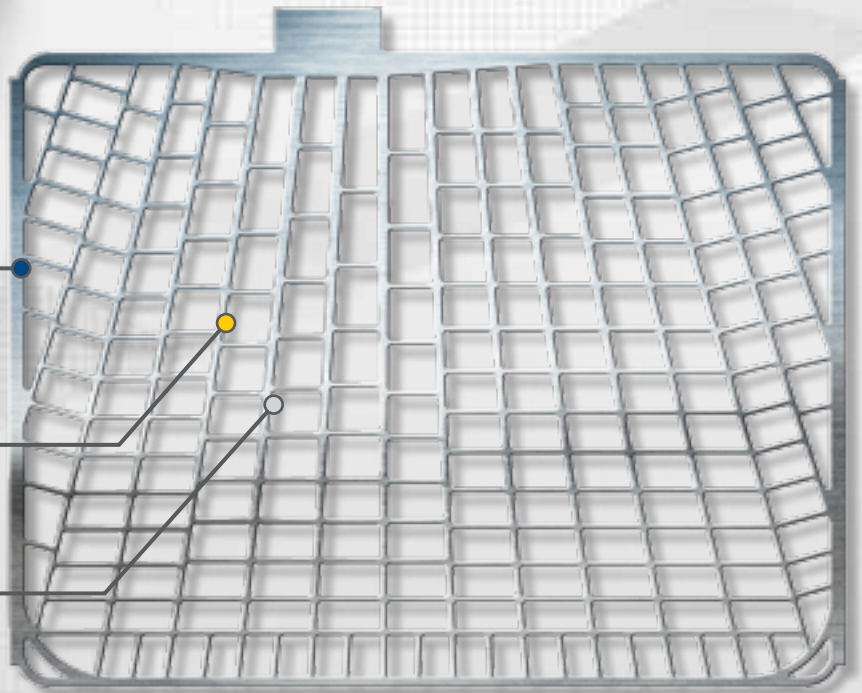

\* Compared to conventional batteries

# SEE THE TRUE STRENGTH INSIDE EVERY VARTA® BATTERY

No other battery is constructed quite like VARTA. Our patented PowerFrame® stamped grid technology is far more robust than both conventional moulded and expanded metal grids.

This unique grid is designed for the perfect current flow and ensures low resistance and optimum conductivity. Which means every VARTA battery recharges quickly, has extremely high starting power and exceptional corrosion resistance. In short, it's built for exceptional performance throughout its long life.

### **Structurally strong**

Built for strength, PowerFrame patented grid technology is up to 66% more durable and more corrosion resistant than other grid designs.

### **Patterned for power**

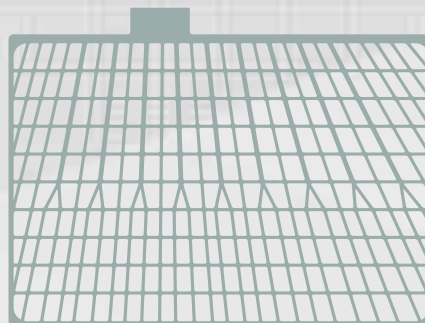

The PowerFrame grid design provides superior cranking power with up to 70% better electrical flow than other grid technologies.

### **Clean construction**

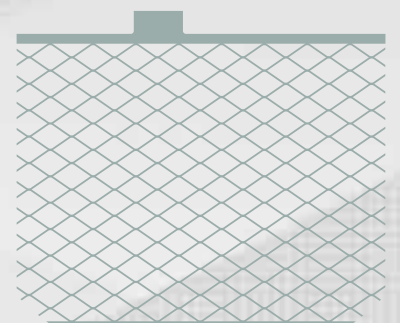

PowerFrame manufacturing uses 20% less energy and produces 20% fewer greenhouse gases than other manufacturing methods.

### **Lasts longer and performs better than standard metal designs**

Most batteries use low-tech bookmold and expanded metal grids, which are highly susceptible to corrosion. Naturally, that affects battery performance and can cause batteries to stop working way before they should. With the PowerFrame grid, a VARTA battery will continue to perform at its very best, long into the future.

**Bookmold**

**Expanded metal**

# ECOSTEPS® IS THE RESPONSIBLE, SUSTAINABLE WAY TO RECYCLE BATTERIES

**ecosteps**® is a recycling program run by Johnson Controls in which certified retailers and workshops ensure professional recycling and contribute to environmental protection. The used batteries are directly fed into an effective recycling process according to the highest environmental standards. Johnson Controls recycling process ecosteps® 'closes' the recycling 'loop' preserving resources and protecting the environment. It's an initiative that's also easy to sign up to, administrate and benefit financially from.

## ***For wholesalers and workshops: a better way to sell batteries***

With our ecosteps initiative, it's easy to demonstrate your commitment to the environment, meet all current legal obligations, increase profits and offer lower prices. Once you've signed up, all you have to do is keep the spent batteries you replace with new products. We'll pick them up when we next make a delivery and recycle them safely and responsibly. And each spent battery you return will help your business save money. That's because we'll credit your account, lowering your costs of new VARTA® batteries.

***To learn more and discover the countries involved, please visit: [www.varta-automotive.com](http://www.varta-automotive.com)***

## THE NEW COST SAVING SOLUTION FOR EVERY TAXI

When you're relying on a vehicle to make a living, it's essential it never lets you down. With our new VARTA® TAXI batteries with AGM technology you get the reassurance of a product built to excel in journeys with frequent starts and stops. And as our batteries are both long lasting and maintenance free, you're free to spend more time on the road earning money. In short, when it comes to cost per cycle, our VARTA TAXI batteries offer significantly better value for money.

### Key benefits

- 3x times longer lifetime compared to conventional batteries
- 3x higher cycling durability compared to conventional batteries
- Significant better value of cost per cycle
- Original equipment specification
- Specially designed for extreme power demands

### Specification chart

VARTA® Code	Short code	20-hour capacity (Ah)	Cold start current A (EN)	Overall dimensions in mm			Case size	Weight (kg)	Layout	Terminal type	Base hold-down

# SEE HOW THE VARTA® TAXI BATTERY WITH AGM TECHNOLOGY PAYS FOR ITSELF

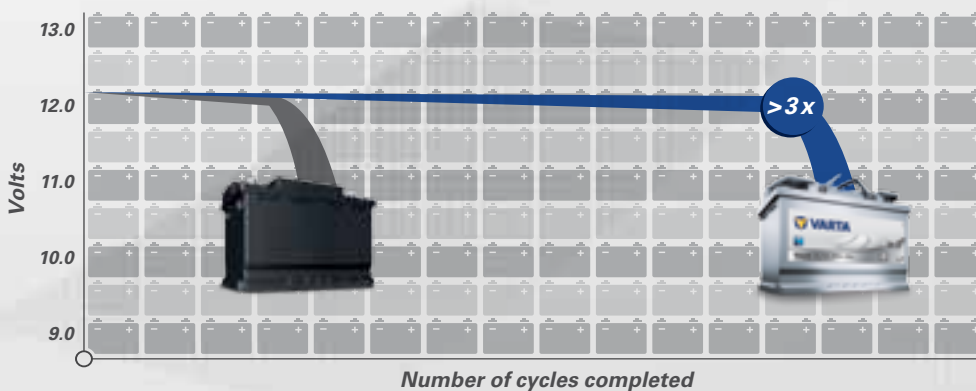

Our Taxi battery with AGM technology will, quite simply, keep your cab on the road for longer and help you maximise your income. But that's not all. This highly efficient product costs far less per cycle than a standard battery.

## Battery Lifetime

Tests in many different countries conducted under extreme climatic conditions all demonstrate that the VARTA TAXI battery with AGM technology lasts up to three times longer than conventional batteries. The test measured the life of the batteries by the number of kilometres on the clock.

## Laboratory Test: Comparing cyclic stability

The VARTA TAXI battery also impresses in the lab, boasting a service life that's more than three times longer than that of conventional batteries.

## Price comparison: Cost per cycle

Choosing a VARTA TAXI battery with AGM technology is bound to pay off, even if the purchase price is higher than those of competitors' products. Once the number of cycles is taken into account, it becomes apparent that the VARTA TAXI is better value. It can withstand up to three times more cycles than conventional batteries, resulting in a significantly lower price per cycle.

	Average market price	Cycles	€ per cycle

# BATTERY TESTING PROCEDURES

## A Visual test

**A1** Is the battery leaking?

**YES** Continue to A2.

**NO** Battery **with** caps: continue to B.  
Battery **without** caps: continue to D.

**A2** Are there any signs of impact, shock or excess pressure around the area of the leak?

**YES** No grounds for a return. Check for potential problems such as the wrong voltage or any foreign objects on the battery surface.

## B Check the specific gravity

In a well-functioning battery, the specific gravity should be the same in every cell. When charging the battery, read the charger and battery instructions carefully.

**B1** Has the specific gravity fallen sharply in one of the cells?

The maximum permissible variation between the highest and lowest values taken across all six cells is 0.03 kg/dm<sup>3</sup>. For example:

1.26 1.26 **1.15** 1.26 1.26 1.26

**YES** Replace the battery.\*

**NO** Continue to B2.

**B3** Is the specific gravity equal in all cells and greater than 1.25 kg/dm<sup>3</sup>?

**YES** Continue to C or D.

**NO** Charge the battery and continue to B4.

**B2** Is the acid a muddy brown colour and is water consumption consistently high?

**YES** No grounds for a return.  
(Check the capacitive load and the car's regulator voltage.)

**NO** Continue to B3.

**B4** If the specific gravity is equal in all cells and greater than 1.24 kg/dm<sup>3</sup>, charge the battery. Is the power consumption equal to at least one twentieth of the nominal capacity (e.g. for a 100 Ah battery: 100 Ah x 1/20 = 5 A)?

**YES** Fully charge the battery and continue to C or D.

If, once the battery is fully charged, the specific gravity reading is 1.24 kg/dm<sup>3</sup> or less, there are no grounds for returning the battery. It is a result of normal wear and tear caused by ageing.  
→ No grounds for a return.

**NO** No grounds for a return.

The battery has been damaged by insufficient charging and/or deep discharging. Check the vehicle's electrical systems (regulator voltage, alternator, drive belt, etc.).

Specific gravity in kg/dm <sup>3</sup> at a temperature of 27°C	State of charge of the battery	Recommendation
1.25 – 1.28	Charged	Consider checking
1.20 – 1.24	Half charged	Charging recommended
1.19 or less	Insufficiently charged	Charge immediately

## C High rate discharge test

**Only conduct this test if the specific gravity is even and at least 1.25 kg/dm<sup>3</sup>; otherwise charge the battery first.**

**Please ensure you follow the battery tester's instruction manual.**

**Does the high rate discharge test show that the battery is "faulty" or "needs replacing"?**

**YES** Replace the battery.\*

**NO** The battery is in good working order.

For discharge testers with adjustable resistances: test the battery at approximately three times the battery's nominal capacity for around 10 seconds (e.g. a 12 V, 45 Ah battery should be tested with a load current of approx. 135 A). During the test, there should be no significant fluctuations in voltage.

## D Test the battery with an electronic testing device

**Please ensure you follow the testing device's instruction manual.**

The correct low-temperature testing current – also known as cold start current or cold cranking amps (CCA) – is found on the battery along with the corresponding standard – which should then be set on the device itself.

### **N.B.**

If the low-temperature testing currents are not specified, please note the following:  
For starter batteries, low-temperature testing current =  $5 \times K_{20}$ , so  $K_{20} = 100$  Ah. The current is  $5 \times 100 = 500$  A. For ignition and lights batteries (especially VARTA® Gel),  $3 \times K_5$  gives the approximate possible cold start current.

If the device only has one setting and it's based on the old German standard, the EU standard current can be used to determine the current of the German standard: current = EN current  $\times$  0.6.

If the temperature falls below 0°, it's necessary to compensate accordingly.

Results	
GOOD	The battery is fully charged and ready to use.
GOOD + RECHARGE	Once the battery has been charged, it will be ready to use.
CHARGE + RETEST	Charge the battery and then repeat the test. If the same message appears after the second test, replace the battery.*
REPLACE THE BATTERY	Battery replacement recommended.*
Test not possible	No readings – check that the measuring cable is properly connected. The battery may be deeply discharged. Charge the battery and repeat the test. If conducting the test in the vehicle, turn off all electrical devices.
No readings despite a proper connection and prior charging	Replace the battery.*

### **General points to remember about testing devices:**

The device calculates the results "good" or "replace" based on the state of charge and the available starting power. It's possible that a battery with 45% starting power can be rated "good" and a battery with 75% starting power as in need of replacement. The starting power represents the difference between the low-temperature testing current entered into the machine and the current that the machine actually measures. It can exceed 100%.

**Electronic testing devices are only suitable for batteries that have been in use for a certain period of time. They cannot provide any indication of the performance of new or unused batteries.**

For this reason, VARTA recommends confirming the nominal figures by conducting the tests as detailed in the EN 50342 standard.

\*Returning the battery in accordance with the applicable returns procedures and warranty conditions.

**A warranty replacement is invalid as a result of:**

- Normal wear and tear
- A failure to follow the instruction manual
- Negligent and improper storage, usage or installation
- Unauthorised modifications to the battery
- The use of so-called means of improvement

**We would especially like to draw your attention to the fact that the period of use, temperatures and the application of the battery play a crucial role in determining whether it attains its maximum service life. Authorising a return should always take place with this in mind.**

# HOW TO USE THE CATALOGUE

## An easy reference guide

We've done our utmost to make this guide as accurate as possible but due to the wide variety of vehicles on the roads and the many variations in individual models, VARTA does not accept responsibility if the incorrect

battery is fitted. Responsibility lies with the installer at all times, so if you're in any doubt, please double-check against the vehicle manufacturer's handbook.

## Understanding the BLUE Dynamic casing label and other Dynamic Trio labels

## VARTA® Start-Stop Plus lid label

Here, you can see a typical Start-Stop Plus lid and casing label. And it's worth noting that vehicles with Start-Stop functions must not be fitted with conventional batteries, but with our specifically designed Start-Stop or Start-Stop Plus batteries. Installing the incorrect battery will impair the vehicle's Start-Stop function and reduce battery life.

## Understanding the Start-Stop Plus or Start-Stop casing label

## Searching online

Remember, our website can also help you match the VARTA battery to your specific requirements.

Simply go to [www.varta-automotive.com](http://www.varta-automotive.com), key in the vehicle manufacturer and model, or selected performance features, and our online Product Finder will display the right battery.

The page features a series of horizontal lines for writing, set against a background of overlapping, semi-transparent geometric shapes and patterns. The shapes include triangles and trapezoids in various shades of gray, some with fine grid patterns. The overall aesthetic is modern and minimalist.

## ***Backed all the way by a global market leader***

VARTA® is powered by Johnson Controls Power Solutions, the global leader in lead-acid automotive batteries and advanced batteries for Start-Stop, hybrid and electric vehicles. In fact, our 50 manufacturing, recycling and distribution centres supply more than one third of the world's lead-acid batteries to major automakers and aftermarket retailers.

And through our innovations, we are building the advanced battery industry for hybrid and electric vehicles too: we were the first company in the world to produce lithium-ion batteries for mass-production hybrid vehicles.

Our commitment to sustainability is also evidenced by our world-class technology, manufacturing and recycling capabilities.
